Last year Sparklet produced quads, 2 does and 2 bucks, this year only one doe that I am keeping. R Sparks

President's Report

Great things happened this year bringing the dairy goats to the forefront. Central Queensland members have had excellent media coverage and continue to work hard for the shows and field days in their area. We even got front page coverage for the Ekka.

Education was also on the forefront with workshops and field days having great attendance by members keen to learn more about their charges. Dr Sandra Baxendell is always happy to share her knowledge with our members.

The show season is over and now it is time to have a well-earned rest and spend some time with your kids. To assist with planning your shows in 2019 the committee is working on a judge's acceptance form, listing all the information needed to ensure all points can be awarded after the hard work involved preparing and showing the goats not to mention the weeks of planning by the stewards.

I would like to thank all the members who have worked so diligently through the year for and with the Society. The members keep the Branch moving forward and promoting goats while making new friends.

During the silly season, please take care and be mindful of the people around you. We need all of you in the New Year.

Cheers Tricia

MEMBERS

You are all invited to an
End of Year Social Gathering

to be held 11.30 am

Jets League Club, Ipswich

Saturday 17th November 2018

We each order and pay for our lunch (choose from their menu) at the Bistro and drinks at the bar.

We need to book according to numbers attending, so if you are planning on joining us, please contact

Elain Rogers 5543 5372

MEMBERS

PLEASE NOTE

November 26

is the **absolute *last day*** for all ads,
changes for shows, stewards,
information regarding facilities etc. for the

2019 Branch Book.

Please phone, post or email changes to editor.

Notice to Exhibitors who attended
SEQ Kid and Goatling Show,
Toowoomba Royal and Caboolture Show.

Committee is sorry to notify members that advice has been received from the Federal Judges Co-ordinator stating that due to the judges officiating at these shows not having a current Bluecard at the time of the show, the Australian Champion Cards and the Queensland Dairy Doe/Kid/Buck of the Year points cannot be allocated.

Unfortunately, the exhibitors who received Australian Champion Cards are now required to return them to Committee, so they can be destroyed. You will all receive a personal letter regarding this.

Please see regulation 94.1 a)

A Judges Licence is now being issued to all judges from the Federal Body and the process is hoped to eliminate this type of error in the future. It brings to light that the stewards have a complicated job to do when organising and running the shows.

I would like to express my appreciation to all judges and stewards who so selflessly give their time and energy to promoting the Dairy Goats in Queensland. Please act on the Bluecard renewal notices as soon as possible [renewal can take many weeks and even months] to avoid the above situation during the future show seasons.

Regards

Patricia Colbran Branch President.

Dairy Doe/Kid, Buck & Poldark points – to 14th October

BASIC GOAT NUTRITION AND THE ROLE THAT LEGUMES PLAY

Dr Bruce McIntosh BVSc (Hons) BAppSc (Rural Technology) Hons

Dietary protein for humans and animals is the most limiting nutrient throughout the world. It is the most expensive component of the diet (meat, milk, fish, legumes etc.) and its distribution is highly variable e.g. Australia and New Zealand have a wide range of protein sources while parts of Africa, Asia and many other countries see children and women in particular, starved of this essential nutrient. Fifty percent of the dry matter of the bodies cells is protein. It is found in muscle, fibre, (hair and wool) skin, hooves, horn, organs, blood, enzymes, antibodies, connective tissue and body secretions including milk and saliva.

Protein is an organic compound as are the other major nutrients present in human and animal diets. Carbohydrates form the bulk of the diet. These include simple sugars or monosaccharides like glucose and fructose, disaccharides like sucrose and galactose and complex sugars called polysaccharides. These are starch, cellulose (framework of plants or fibre) and lignin (structural support of plants). Wood is an example of a highly lignified polysaccharide.

Plants manufacture carbohydrates by the process of photosynthesis. The sun's energy is used by the plant to convert atmospheric carbon dioxide (CO₂) and water (H₂O) into the simple sugar glucose (C₆H₁₂O₆).

Glucose molecules are then joined together by the plant to form starch, cellulose and woody material. Fruit bearing plants will alter some glucose molecules to form fructose or fruit sugars. Grasses including sugar cane combine glucose and fructose to form sucrose or sugar as we know it. Note that oxygen is given off as a product of photosynthesis. Oxygen is critical for our survival as it is required by the body for cellular respiration. During this process, glucose is metabolised to produce

energy, carbon dioxide and water. Animals breathe in oxygen for this process and exhale carbon dioxide as a by product. It is basically the reverse process of photosynthesis in which the sun's energy is released in the process.

Just like us, plants can store excess energy in another form. We store it as fat whereas plants do so as oils. Examples are peanut oil, sunflower oil, coconut oil etc. The chemical structure again is just carbon, hydrogen and oxygen combined in various ways, but the energy level of a unit of oil or fat is greater than the same weight of starch. Wheat has a digestible energy density of 14MJ per kilogram whereas oil is 36.6MJ DE per kg.

Simple sugars and starch can be broken down in the gastrointestinal tract of all animals because they secrete the enzyme amylase which initiates the digestion process. Complex carbohydrates like cellulose or plant fibre cannot be broken down by any animal because they do not have the enzyme cellulase to start that process. Bacteria, fungi and protozoa can digest this fibrous material because they secrete cellulase. Ruminant animals like goats, sheep, cattle, deer etc. have developed four stomachs and house these microorganisms in the first stomach or rumen to undergo this task. During the fermentation process which takes place, volatile fatty acids are produced, and these are absorbed by the animal and converted to glucose and fat. Methane gas is one of the end products of fermentation and must be belched up to avoid the animal bloating. To multiply and perform their task efficiently, these little rumen animals also require energy, protein and other nutrients. Therefore, when ruminants are on poor quality roughage the addition of important nutrients like protein and minerals encourages the multiplication of rumen micro flora which improves the efficiency of digestion of fibrous material in the rumen. The rumen is emptied quicker which in turn stimulates the animal to eat more. This is exactly what we want in production animals. It is worthy to mention here that not only can ruminants digest fibrous material, but fibre is essential for rumen and gut health. The horse and other animals have a large appendix where

fermentation by microorganisms takes place. The process is not as efficient as rumen digestion as can be seen by the amount of fibre in horse manure.

Protein is an organic compound made up of building blocks called amino acids joined together by peptide bonds. Imagine a brick wall as a piece of protein like steak and each brick is an amino acid. They are made from C, H and O with the addition of nitrogen (N) and in some cases sulphur. During digestion the peptide bonds are broken, and each is then released for absorption into the body via the blood stream. There are many different amino acids and are described as either essential or non-essential. Monogastric animals like humans, pigs, poultry and dogs etc. require nine essential amino acids to be included in their diet because they cannot make them from the non-essential ones. Examples are lysine, methionine, histidine etc. The non-essential group can be synthesised in the body from any amino acid. In the ruminant animal. The microorganisms break down most of the protein in the animal's diet for themselves to make amino acids. They combine these to make their own microbial protein and as they pass down the digestive tract with the food mass, they themselves are digested and the nutrients including the amino acids are released. They can also use nitrogen from a non-protein nitrogen source like urea $[\text{CO}(\text{NH}_2)_2]$ to incorporate into their own body protein. Lick blocks containing molasses, urea and other valuable nutrients like calcium, phosphorous, sulphur etc are used to exploit this ability of microbes to utilise a cheap source of nitrogen to make protein. The bulk of animal protein (meat and milk products) in the world is produced by this effective unique biological process called rumination. Without it mankind could not flourish.

The dietary protein requirement of domestic animals has been scientifically established and varies with the stage of production. Because the goat is a ruminant, note that there is no mention of the essential amino acid requirements.

to be continued

Members, all Newsletters and the Branch Book are put on the website for your convenience. If you would prefer to receive a hard copy please inform the Secretary or Editor in writing.

UREA. In drought and semi-drought conditions, urea has been used to supplement poor quality dry pasture and low protein hay to speed up the rate of digestion, increase food consumption and stop animals losing weight. Such a strategy postpones the time when an energy supplement such as grain will be necessary.

Urea is a chemical compound containing a high percentage of nitrogen. Although it has often been referred to as a protein supplement, this is not strictly correct. Urea assists in the rumen digestion process, so in most drought feeding situations a supplement such as molasses must be fed with urea to ensure that the supplement is effective.

Consider a urea supplement only as a pre-drought strategy for use while ample dry feed is still available and restrict it to adult dry goats that are still in good condition. Even here, the chance of failure is high and gains may not be adequate to cover labour and material costs.

When using urea as a supplement:

- A] Ensure that each adult goat consumes between 6 and 8 grams of urea per day.
- B] Supply some readily digestible energy such as molasses or grain to ensure efficient use of urea and reduce toxicity. Six grams of urea should be consumed with at least 25 grams of molasses or 100 grams of grain. Ensure that urea is evenly mixed in any ration to avoid urea poisoning.

Blocks, licks, porridge mixes and commercial nuts are the most common methods of feeding urea to goats.

HAY is a good source of roughage for drought diets and is extremely variable in quality, ranging from good lucerne hay through to cereal stubble. Good quality hay can substitute for grain in a drought ration, but with drought feeding there is no benefit in feeding hay unless it is a cheaper source of energy than other feeds.

However, hay is beneficial in the following circumstances.

- A] As a source of slow release energy to help goats over a period of cold stress. Hay is digested more slowly and will supply some energy, and therefore heat, for a longer period than grain.
- B] To combat grain poisoning, hay is useful when beginning a grain feeding programme, where the proportion of hay should be high and slowly reduced over a three week period, thus reducing the risk of digestive upsets from grain.
- C] Where some goats in the mob may refuse to eat a 100 per cent grain diet.

When daily feeding baled hay, break bales open and scatter biscuits over the feeding area.

If hay is being fed once or twice weekly, do not break the bales open, unless they are very dense, tight lucerne bales. An idea is to stack two or three bales on top of each other, drive a steel post between ties and the bale, and into the ground. This keeps the bales and ties together. With round bales, leave intact in the feeding paddock.

Hay needs no treatment before feeding, but sheathed hay needs to be chaffed before feeding to kids and weaners. When feeding kids and weaners high quality lucerne or clover hay, it is best to feed in racks with a tray underneath to catch the valuable leaf material.

EDIBLE SCRUB is particularly important. Goats can consume a large variety of common trees and scrub that can maintain them during a drought. Only top scrub species that goats usually eat – if your goats are very hungry there is a risk that they could eat poisonous plants that they would usually ignore.

Here are some tips that have worked for property owners who have fed scrub successfully to their goats during drought. You may like to use some or all of them, depending on your circumstances.

A] Start lopping branches early and train goats to eat a variety of scrub. Some owners claim that this is best done while goats are still kids.

B] Provide scrub in steadily increasing quantities while grazing is still available and before goats lose too much condition.

C] Start lopping scrub around watering points, camps and on tracks.

D] To begin, lop only the best and most palatable scrub.

E] Lob some fresh scrub each day and at the same time of day.

F] At first the consumption will be small, so don't top too much. Limit the supply of scrub to the amount that is eaten each day. Increase it when all of the daily supply has been eaten and goats are looking for more.

G] Most goats will come to the daily sound of lopping but ensure that all goats learn to come. Muster stragglers each day.

H] Gradually move away from water while still cutting small amounts. When goats have learnt to depend on scrub for their feed and readily come to the sound of lopping, move to the point furthest from water.

I] When full-scale feeding is underway, concentrate on the least palatable species but provide a mixture of these species. Retain most palatable species for use when paddock feed is depleted.

J] Completely clean up an area before moving closer to water – this will make maximum use of any grazing.

K] Lop plenty of scrub with a good mixture of species for does and kids. Put some near water and some at several locations away from water up to a distance of 1.5km.

You will need to give pregnant does and kidding does an additional grain supplement.

WATER SUPPLIES

If you have a successful drought feeding programme, you will need a reliable water supply. In past droughts many properties were affected by a shortage of water while ample grazing was still available.

It is important to provide weaners with the best water available, preferably in troughs. If you have a reticulated supply, the rate of flow is more important than the length of your trough.

The amount of water a goat will drink in one day depends on the temperature and the amount of shade available, the type of feed, the salinity of the water and the class of goat.

Table 1 is a guide to the maximum salinity that different classes of goats can tolerate and the quantity of maximum salinity needed each day.

Table 1. Water consumption and maximum salinity for drought feeding with hay, grain or dry pasture.

Class of goat	Consumption per head per day *	Maximum salinity (total salts in parts per million)
Weaners	4 – 6	7000
Adult dry goat	5 – 7	14000
Doe with kid	5 – 10	10000

* This table relates to goats on a low salt diet such as hay, grain or dry pasture. Goats that have diets that consist largely of salty plant material such as salt bush [Atriplex spp.], blue bush [Maireana spp.] or copper burrs [Scerolaena spp.] require water that contains less than 10000 parts per million of dissolved salts. Other classes of goats require water with correspondingly lower salinity.

Ground tank water could be polluted by manure if goats are allowed to camp on tank banks – one shower of rain could wash enough manure into a tank to make it useless. Large numbers of livestock around a tank can turn the ground into a quagmire with weaker goats getting bogged. The only solution to these problems is to fence off the tank and install some form of temporary reticulated supply. For example, a fire fighter unit, some plastic pipe and temporary troughing made from 200 litre drums would be cheap and effective, provided it can be kept full at all times.

WHAT AND WHEN TO FEED

Begin feeding your goats well before they fall to the lowest liveweight at which they will survive.

Teach each new kid drop to accept hand feeding before you wean them. Use older animals with previous feeding experience to educate young, inexperienced ones.

When you are starting to feed inexperienced goats use a palatable feed, such as good quality hay, and scatter it over a large area so that all your goats get some at the same time. This is best done in a small paddock or large yard with good shade and water, but no available grazing.

When your goats are used to eating the hay, pour grain over each new feed of hay and gradually increase the grain ration at each feed.

You can delete hay from the ration when your goats are used to eating grain.

While goats are being introduced to hand feeding, they can lose more weight. It takes three weeks to introduce goats to a full grain ration, such as wheat, so it is essential to commence while they are strong and in reasonable condition.

The critical survival weight varies between the type, breed, reproductive status and age of goats. Choosing the correct weight is made more difficult by some goats losing condition faster than others.

The mob may need separating, since some of the animals may not require hand feeding, thus reducing feed costs.

If scales are available, use them to determine liveweight loss by weighing a sample of the mob over time.

It is important to start hand feeding before your goats reach their critical survival liveweight.

EDUCATING THE SCHOOL STUDENTS IN WHAT SHOWS ARE ABOUT

Boonah Show Society has a junior chamber that assists in the running of the School Education section of the show. It is not just the agriculture sections but encompasses all areas, handcraft, cooking, wildlife are covered as well as preparation of exhibits both animal and crafts. There are practical demonstrations on care of animals as well as show trimming. Information on feeding and general care as well as dealing with the pests that plague our farmers. 250 students passed through the goat section alone, one group we had visit us was a home school group. The young kids (the four legged ones) are always a hit with the students.

Minutes

Minutes of the committee meeting held Saturday August 2018

Venue Rosewood Community Centre School Road Rosewood. Commencing 12.30pm

Present P Colbran (chair) B Rogers, G Hunter, E Rogers, G Rogers, S McKay, D McCarty, S Stewart

Visitors: Nil

Apologies: I Millett, K Thompson

Welcome and Acknowledgement of the traditional owners of the land.

Confirmation of the minutes of the committee meeting held on the 22nd July 2018

Moved G Hunter **Seconded** E Rogers "that the minutes as circulated are a true record of the meeting" held on 22nd July 2018 **Carried**

Business arising from the minutes: Due to no response from R Bruce the committee has instructed E Rogers to source photos of all goat breeds for the Webpage. They are to be submitted to the committee for approval to use

A workshop:

Was held Sunday 15th July 18: Subject *Lactation and Udder Facts*

We have had a request from a member to hold a Workshop in the Gin Gin area. S Baxendell has stated that she is willing to travel to the Gin Gin to hold this workshop on Lactation & Udder Facts and would also if requested spend an extra session at no extra cost on CA

P Colbran contacted Lynette Marszal and arrangements will be made to hold a workshop with L McDowell and K Coghill

The secretary has written a letter to Olssons on the 13 June 18 to ask if they wished to continue with their sponsorship to both the Qld Branch Show and the Spring Spectacular Show but has received no response to date

- The Secretary to wait until the end of July and then contact Olsson's by phone for their response to our request for sponsorship

Correspondence: Items inward = 34 items outward = 25

Business arising from the correspondence:

A letter from A J Parkes re name tag badges

This is to be followed by D McCarty with both A J Parks & Vista on the price to manufacture a small badge of a similar design to the Qld Branch banner

- Quote received for approx. 25x30mm rectangular shape brass backed with digital print of Qld Branch Emblem and fitted with a butterfly clutch
- Cost per 100 = \$231.50 plus postage. This should work out at approx. \$2.30 each

Moved E Rogers **Seconded** by B Rogers "that if the draft of the logo was correct 100 to be purchased" **Carried**

Reply The reply was emailed to the committee. It stated only that they would look in to it

Moved: G Hunter **Seconded:** E Rogers “that the inwards correspondence be accepted and the outwards endorsed” **Carried**

Membership Applications:

Change of prefix only

Peta O'Connor (nee Bradley) Q650013 wishes to change her Prefix which she is yet to use from Ellangowan to Chesworth. Please advise if this is ok, it is available for use on the database.

Moved E Rogers, **Seconded** D McCarty “that the above prefix change be accepted” **Carried**

REPORTS

Treasurers Report: 1st July to 31 July 2018

Opening Balance as statement 116 **\$9,333.37**

Withdrawals & Debits

\$300.00 Float for Workshop

\$ 47.25 printer ink

\$583.32 two rebates Federal Council airfares

\$ 7.88 Australia Post account

\$130.00 EKKA trophies plates

\$335.00 EKKA \$75.00 Country branch show

\$ 55.20 Printer ink

\$875.33

Closing Balance as statement 116 **\$10,983.37**

Accounts due

\$60.00 for show entry tickets for committee members as show passes limited this year

National Pens for torches \$180.23

P Colbran for Labels, book display stand, coreboard, star bursts for EKKA display \$92.28

P Colbran and R Bruce fuel to take and return items to EKKA \$20.00 each

Moved: by P Colbran on behalf of I Millett **Seconded:** D McCarty “that the Treasurers report received electronically be accepted and the accounts passed for payment “ **Carried**

Export: Aware only of an export Saanen order to Taiwan out of Dalby

Milk Awards: 2 submitted by K Coghill and another recently arrived still to be checked out

Newsletter: Ready to send out in the next week. Only a couple of small changes to be made

- Ruling on photos for future Newsletters are as follows

All titles won by a goat are to be included in 1 photo

Photos only of Breed Champions, Best Udder and Supreme exhibit

Dairy Doe: No changes to date. Liaison papers from the EKKA are now completed awaiting proof reading and when completed will be sent on to G Rogers for D D

Points and I Millett for Newsletter & AGW

G Hunter to locate the Poldark and R McClelland Trophies

RNA: Report on sales of soap etc from the information stand at the EKKA

- Refer to EKKA sales

Facebook Page: More people joining our Facebook page every week. This could also lead to more joining the DGSA

AGW:

- Results and photos gathered from the EKKA to be sent to Sue Seager for inclusion in the April edition which is for Qld

Shows:

F Vejle said he would like to reinstate some of the smaller shows such as Lowood, Esk, Gatton etc

Although this was thought to be a good idea it was suggested that he contact the show societies and seek permission also find out if pens, tie up areas, straw was available, Prize ribbons available and report these details back to the committee

- This is still work in Progress

L Morley suggested that the Branch donate small single coloured ribbons for 24hr and herd recording a total of 4 ribbons to all Qld shows. E Rogers to check costs and report back.

E Rogers submitted the cost of the ribbons in both 50mm and 75mm width

This was discussed at length and it was decided that instead of a ribbons the Web manager would upload certificates on the Webpage showing goats name, award and the name of the Show. This would only be displayed for the owner to download a copy for their records and would only be displayed for a short period.

S Steward to submit a draft copy for committee for approval.

E Donald has requested that she wishes to take over the role of Liaison officer for the Nanango Show in 2019.

The secretary has spoken and written to the Nanango Show Society stating her request and that she has approval to carry out this role from The Queensland Branch of the DGSA

- We have not received a reply. It was suggested that E Donald should also contact them again

New schedule to be used at Beaudesert Show: Plus a class for any other dairy breed to cover the new breeds should there be any entered

Branch Show: Judge Anne Hill appointed

- Presently waiting on cost of flights and accommodation should it be required
- I Millett to contact Dairy Express for donation
- E Rogers to contact B Sweet donation
- P Colbran to arrange gifts for Judges

Spring Spec Show: Judge Kate Thomson appointed

- Presently waiting on cost of flights and accommodation should it be required

- P Colbran to bring Hotdogs, Sauce, Drinks and bread. Suggested price Hotdogs & bread \$2 Drinks \$1

Kid and Goatling: No Judge as yet, still work in progress

- Agreed to be now the 10th March 2019 at Beenleigh Show Grounds

EKKA:

- Aust Championship Cards to be completed and posted out to the winners These are to compiled by E Rogers and checked by G Rogers [Dairy Doe Convenor] and signed by the President and the Secretary
- The president thanked all for their work on the information/soap sales table at the EKKA and it was noted by the secretary that a vote of thanks be issued to her for her good work also at the EKKA
- A card of thanks to be sent out to those members who also helped out with the information table they include K and H Coghill, L McDowell, A Shirley, K and R Billiau, K and M Thomson and to Ben Matthews the Chief Steward

Website:

- Work in Progress
- P Colbran has sent the details of the book sizes and weights and the soap weight and size along with the bank details for S Payton to finalise the sale page. This should soon be up and running as only a couple of small items to fix up.

Soap:

- 20 boxes on order are now awaiting arrival. None left over from the EKKA but 81 cakes labelled differently is still in stock.
- P Colbran has received an email from a lady that was unable to purchase soap at the EKKA. P Colbran is to reply to this email

EKKA SALES:

- We sold- 21 x torches, 5 When I Buy a DG, 14 x info packs (the torches were a good selling point) 10x recipe books 17 x Pens and 12 x caps. Not sure of the numbers for the Basic Goat Care or the show Ring. Total soap sold was 1,437 cakes.

We have some soap that was wrapped by Scott Payton with the purple bands which we can try to sell at the Branch show. We only have 1 cap left.

Federal Council: Awaiting result from report submitted

GENERAL BUSINESS:

All Blue cards issued to DGSA members (judges, committee stewards etc) if they did not apply for the Blue Card through the DGSA they need to have that card linked to the DGSA. There is a form called 'Link Form' that they need to complete which will link their card to the DGSA – apparently every place using the card has to be linked to the card. E Rogers has written to the Blue Card Office for clarification on this Link?

- Waiting on reply

- Tim Byrne blue card is about to expire. The secretary is to contact him and ask if he wishes to remain on the Qld judges list.
- E Rogers advises that her CAE A/C Certificate was sent to I Millett for publication in the Newsletter but problems by I Millett opening the file. This also happened with S Stewart. Copies of these certificates to be sent to P Colbran to fix this problem

No further items from members Next meeting 23/9/18 Meeting closed 2.27pm

MINUTES OF the committee meeting held on 30/9/ 2018

Venue: Rosewood Community Centre School Rd Rosewood. Commencing at 12.47 pm

Present: P Colbran [chair], B Rogers, G Hunter, E Rogers, [phone link S Stewart, D McCarty, G Rogers, [K Thomson and S McKay.]

Visitors: Nil

Apologies: I Millett

Welcome and Acknowledgement of the traditional owners of the land.

Confirmation of the minutes of the committee meeting held on the 26/8/ 2018

Moved G Hunter **Seconded** B Rogers, "that the minutes as circulated are a true record of the meeting held on 26/8/ 2018."

Carried

Business arising from the minutes:

E Rogers to source photos of all goat breeds for the Webpage and submit to the committee for approval to use: Permission has been gained from R Sparks, L McDowell, A Car, D Richards, I Hanmer, and D McCarty. The photos will be distributed to Committee before being uploaded. S Payton is able to remove any show ribbons which may be on the goats depicted in the photos.

S Baxendell has stated that she is willing to travel to the Gin Gin to hold a workshop on Lactation & Udder Facts

- P Colbran contacted Lynette Marszal and arrangements will be made to hold a workshop with L McDowell and K Coghill – No further correspondence regarding this matter so it is up to the members who want to have the workshop in their area to arrange it.

The secretary has written a letter to Olssons to ask if they wished to continue with their sponsorship with the Spring Spectacular Show G Hunter collected a consignment of blocks which are to be shared with the Branch Show and the Spring Spectacular.

Correspondence: Items inward = 27 items outward = 12

Business arising from the correspondence:

- Application from D Brown to be approved as a level 2 judge: - **Moved** G Hunter **Seconded** E Rogers "that the application for Level 2 Judge status be accepted when the surname being used is established as we have two names for this lady." [G Hunter to confirm name]

Carried

- Letter from Chinese delegation that are visiting Queensland: - This was passed on to Dr S Baxendell and S Jessen as contacts with possible information to share.
- Email from Queensland's regional exports? Learn more at our webinar: - Forwarded to S Jessen as Federal Export Officer

A letter from A J Parkes re name tag badges

- Quote received for approx. 25x30mm rectangular shape brass backed with digital print of Qld Branch Emblem and fitted with a butterfly clutch
- Cost per 100 = \$231.50 plus postage. This should work out at approx. \$2.30 each

Moved E Rogers **Seconded** by B Rogers that if the draft of the logo was correct 100 to be purchased **Carried:** As the motion had been put to purchase these badges, it was **RESOLVED** to go ahead with the purchase.

- **Publicity folders** have been received from C Packham and will be filled with information for sale at the price set by FC being \$5.00 each.

Moved: G Hunter **Seconded:** K Thomson "that the inwards correspondence be accepted and the outwards endorsed."

Carried

Membership Applications: Nil

REPORTS

Treasurers Report: presented at meeting by the president on behalf of the Treasurer.

As there was an anomaly with the addition, this is to be rectified and presented to the next meeting.

RESOLVED to forward a payment of \$75 to K Staines being the outstanding amount for last year. A letter is to accompany the payment with suggestions of how to economise with show expenses so lessen her personal burden.

Export: Nothing happening on the export scene.

Milk Awards: Some applications have been received along with an application to commence herd recording.

Newsletter: Sent out

- Ruling on photos for future Newsletters are as follows
All titles won by a goat are to be included in 1 photo
Photos only of Breed Champions, Best Udder and Supreme exhibit
- Big memo regarding renewal of memberships by end of December otherwise extra fees and reapplication is required.
- Reminder for closing date of changes and advertisements for the Branch Book

Dairy Doe: No changes to date. Liaison papers from the EKKA are now completed awaiting proof reading and when completed will be sent on to G Rogers for D D Points and I Millett for Newsletter & AGW.

- G Hunter has located the Poldark trophy [with L McDowell and required for the K&G show in March]

- and R McClelland Trophy is with J Wilson who has been asked to return for presentation at the Spring Spectacular.

RNA: The Australian Champion Cards were completed by K Thomson and forwarded to the appropriate recipients.

- A discussion took place regarding the incorrect results that are on the RNA website.

Facebook Page: We now have over 250 members and all is going well at the moment.

AGW: Results of the Branch and Spring show to be forwarded with photos for the April edition. K Thomson will also forward a report from the judge at the EKKA for publication.

Shows:

F Vejle said he would like to reinstate some of the smaller shows such as Lowood, Esk, and Gatton etc

Although this was thought to be a good idea it was suggested that he contact the show societies and seek permission also find out if pens, tie up areas, straw was available, Prize ribbons available and report these details back to the committee

- This is still work in Progress

L Morley suggested that the Branch donate small single coloured ribbons for 24hr and herd recording a total of 4 ribbons to all Qld shows. E Rogers to check costs and report back

- This was discussed at length again and due to logistic issues this is changed. Cards will be used.

Moved E Rogers **Seconded** D McCarty "that the Branch Supply cards for milk classes instead of certificates on the website."

Carried

E Donald The secretary has spoken and written to the Nanango Show Society stating her request and that she has approval to carry out this role from The Queensland Branch of the DGSA

- We have not received a reply. It was suggested that E Donald should also contact them again. E Donald will forward a copy of the schedule she is using and will continue to communicate with the show society.

Branch Show: All went well, payment made to Ann Hill for expenses.

Discussion took place regarding ribbons and communication. A new email address has been sourced and this should make the communication at show time more reliable. A cheque sent for payment of FC approved sashes, and the Treasurer will need to make application for reimbursement

Spring Spectacular Show: Judge Kate Thomson has been appointed and accommodation arranged at D McCarty's residence.

- P Colbran to bring Hotdogs, Sauce, Drinks and bread. Suggested price Hotdogs & bread \$2 Drinks \$1

Kid and Goatling: No Judge as yet - still a work in progress

- Agreed to now be the 10th March 2019 at Beenleigh Show Grounds

EKKA: A card of thanks was sent out to those members who also helped out with the information table they include K and H Coghill, L McDowell, A Shirley, K and R Billiau, K and M Thomson and to Ben, the Chief Steward.

Website:

- Work in Progress – show results and photos need to be forwarded so they can be loaded onto the page
- P Colbran has noted that the for sale page on the website is up and running with a shopping bag icon now visible

Soap:

- 20 boxes on order have arrived.
- P Colbran has received orders for a pack of 10 and a pack of 30 following the EKKA and these have been forwarded after payment was received.
- We have some soap that was wrapped by Scott Payton with the purple bands which we can try to sell at the Branch show. We only have 1 cap left.

Federal Council: Awaiting result from report submitted

GENERAL BUSINESS:

All Blue cards issued to DGSA members (judges, committee stewards etc) if they did not apply for the Blue Card through the DGSA they need to have that card linked to the DGSA. There is a form called 'Link Form' that they need to complete which will link their card to the DGSA – apparently every place using the card has to be linked to the card. E Rogers has written to the Blue Card Office for clarification on this Link?

- Still waiting on reply
- Tim Byrne blue card is about to expire. The secretary has contacted him, and he wishes to remain on the Qld judges list. The appropriate paperwork will be forwarded to him to complete and submit.
- Discussion regarding assistance for a member due to ill health, not financial member atm. The secretary will contact and offer financial assistance to renew membership if the member is happy to accept.
- Branch Book changes and show schedules for 2019 to be finalised at the next meeting please.
- Earlier this year it was requested that a copy of the liaison forms be uploaded to the webpage for easy access. This has not been done so it is requested that a copy be finalised with the schedules at the next meeting and be uploaded ready for the new show season.
- E Rogers is to contact Jets Leagues Club regarding having an end of year social event there on Saturday 17th November for lunch.

- No further items from members Next meeting 28/10/18 Meeting closed 2.47 pm

continued from page 17

Take care when introducing goats to grain and pellets or nuts, as there is a risk of grain poisoning. Goats cannot be put straight onto a large ration of grain or pellets or nuts, as heavy losses may result. Time must be taken to build up to higher levels of grain feeding. The introductory program outlined in table 2 should be used for all grain-based feeding.

Days	Amount of grain per head [grams]	Frequency of feeding
1 and 2	50	daily
3 to 5	100	daily
6 to 8	200	daily
9 to 12	300	daily
13 to 15	370	daily
16 to 19	430	daily

There is no necessity to treat the grain in any way. In fact, digestive upsets and poisoning are more likely with crushed or hammer-milled grain and, once treated, such grain can no longer be fed on the ground.

However, where a large percentage of grain is fed, sodium bentonite should be included to reduce the risk of grain poisoning. *to be continued.*

Don't forget to pay your membership on time or risk having to reapply and pay extra fees.

BEST WISHES TO ALL FOR A SAFE AND HAPPY CHRISTMAS AND NEW YEAR,

QUEENSLAND CAPRINE RETROVIRUS CONTROL SCHEME CERTIFIED HERDS AS AT 29th November 2018

As this list has proven to be vital to members, the Queensland Branch of the Dairy Goat Society of Australia Inc. has decided to continue to publish the list of **Qld** certified members on a voluntary basis.

It is **not** a complete list. The only details listed will be those as shown above.

As your certificate expires, you will need to forward a copy of the new certificate to the Secretary or Newsletter Editor in order to stay on the list.

A copy of your CRV certificate **signed on the back** with “consent to publish” with your signature can be posted to:

Secretary, Mr Graeme Hunter, 181-191 Leach Rd., Tamborine 4270, or email to:
secretary@dairygoatsqld.org.au

If you would like your street name withheld from the list please notify the editor.

Thank you to those members who have forwarded their certificate.

EXPORT: CAE Accredited stock is preferred by export agents. It could be in your own interests to have your accredited herd listed above.
